PRESS RELEASE

FOR IMMEDIATE RELEASE
March 24th, 2005

LOCAL WEB DESIGN FIRM PARTNERS WITH LEADING US BASED E-COMMERCE FIRM

(Dawson Creek, BC) There isn't a day goes by when we don't read or hear about a BC based Internet business working virtually with clients around the globe. One such business, located in northern British Columbia, has recently expanded its role and partnered with San Francisco Bay Area based Evocative Inc. Starting April 1st, Eldoren Consulting Inc. will be looking after and providing site management and marketing services for Evocative Inc, including three of its divisions located in Emeryville, California.

"We have worked with Evocative for a few years in a sales role working with their Evocative Commerce™ product for clients around North America. With the recent expansion at Evocative and their purchase of a world class data centre, this newly expanded partnership will mean huge opportunities for my company" commented Gordon Currie, CEO of Eldoren Consulting. "The fact that a company like mine can work with a company this technologically advanced means I will be working with cutting edge software and hardware. This will allow my company to grow and develop new markets I haven't previously been able to tackle until now."

Eldoren Consulting Inc. has specialized in the Internet and online marketing for a number of years and has designed over 150 commercial websites. Clients have ranged from small home based business to Fortune 500 clients. Expanded service offerings will include managed servers, backups and managed firewall. Working closely with the engineering team at Evocative's Light Harbor Managed Services and the Emerytech Data Center, Eldoren will also provide custom design services for the new generation of e-commerce business solutions coming out as well as specialized marketing services to Evocative's client base.

Currie maintains, "Canadian web businesses can compete internationally on an even playing field using current technology. This partnership with a very successful US based e-commerce firm from a town of 11,000 in Northern, BC, continues to draw attention to the opportunities for technology companies in the north." Eldoren Consulting has been profiled by CNN, Profit Magazine, Canadian Business, Wall Street Journal, Inc. Magazine, Associated Press, and other media for his innovative guerilla marketing methods and unique design skills. Eldoren Consulting's clients are based from Australia to Alabama, from New York to Sweden.

So where does Eldoren Consulting go from here? With this year's projected revenues increasing by 450%, the focus will remain on building his business relationships and expanding his independent contractor workforce. Don't expect the growth to stop. "I am having a blast now, growing my company and I'm doing it all from Dawson Creek, BC!"
